## ABOUT THE CONFERENCE

It is our pleasure to announce BOSICON the **3rd International Conference on Contaminated Sites Remediation**, that will be held on September 11-14, 2012 in Rome, Italy

BOSICON is organized by The Interuniversity Centre of Technology and Chemistry for the Environment (CITCA), the Italian Association of Chemical Engineering (AIDIC), and the Department of Civil and Environmental Engineering (DICEA) of Sapienza University of Rome.

Following to the previous Conferences held in 2006 and 2009, the Third International Conference on Contaminated Sites Remediation, Bosicon 2012, aims at presenting recent scientific and technical contributions in characterization, risk assessment, innovative process design and new technologies in the field of Contaminated sites, as well as brownfield restoration.

Recent events have shown the important role that environmental monitoring and remediation play in responding to man made and natural disasters. As a result of the need for authorities and the environmental community to better plan for future emergencies, the Conference scope has been expanded to address issues related to both planning for and conducting the environmental monitoring that is necessary to protect public health and the environment from releases of chemical, biological and radiological contaminants; and remediation technologies needed to address the releases.

Bosicon 2012 will gather stakeholders from industry, as well as researchers and engineers from universities and institutions, to present recent advances and new ideas in remediation tools, design, technologies and management.

The conference will be scheduled in three headlines:

1. Characterization, monitoring and risk assessment
2. System design and management
3. Treatment and remediation

Each above mentioned topic will be exploited with respect to polluted groundwater and soil, and marine and freshwater sediments.

Oral and poster sessions will take place: each oral session will be introduced by keynote speakers.

The official language of the conference is English.

## CONFERENCE TOPICS

The Conference will bring together experts from all over the world to exchange key information and hold helpful discussions on the topics listed below. Specific sessions on key topics will also be organized. Plenary lectures on key-issues by recognized experts will also be scheduled.

- 1) CHARACTERIZATION AND MONITORING
- 2) RISK ANALYSIS AND DESIGN
- 3) TECHNOLOGIES AND MANAGEMENT
- 4) CASE STUDIES

## ABSTRACT SUBMISSION

The official language of the conference is English.

Authors wishing to present a contribution are asked to prepare maximum one page abstract to be submitted ONLY by web-page to the Conference Secretariat <http://www.aidic.it/bosicon>

**The first deadline is November 30<sup>th</sup>, 2011**

For each accepted abstracts the submission of a full paper is required.

For each papers published into the CET proceedings, a fee is required.

## PROCEEDINGS

The full set of accepted papers of BOSICON Conference (in the form of short papers of 6 pages) will be published into CET "Chemical Engineering Transactions" .

The quality of this publication is valued by ISBN & ISSN numbers, reference by SCOPUS and THOMSON REUTERS (ISI Web of Knowledge, conference proceedings) citation indexes.

Each Paper in the volume is covered by a copyright assigned to AIDIC Servizi S.r.l.

Each Paper is evaluated for acceptance by at least two Peer Reviewers.
